

# TECHNOLOGY MANAGEMENT

University of Northern Iowa College of Humanities, Arts & Sciences  
<https://tech.uni.edu/>

## ABOUT THE MAJOR

The technology management program at UNI provides students with a broad background in the use of technology management with human, material and information resources. It links concepts of engineering and advances in technology with business management and organizational skills. Preparing students for technical and industrial management positions, individuals in this program engage in industrial studies such as organization, resources, processes and management technologies.
